Presentation skills

Experience

---

1) Front-End Developer — 4S Software (12/2024 – Present)

- Built and maintained 30+ responsive UI pages/components using React.js / Next.js with reusable component architecture.
- Integrated REST APIs using Axios, handling loading/error states and data normalization.
- Revamped legacy ERP and CRM interfaces, modernizing UI/UX and improving usability across core modules.
- Collaborated with backend and design teams to deliver features and resolve UI/UX issues.

2) Front-End Development Course — Route Academy (09/2024 – 02/2025)

- Completed a hands-on program covering React, Next.js basics, TypeScript fundamentals, APIs, and UI development.
- implemented form validation for 5+ forms using Formik/Yup, reducing invalid submissions and improving user flow.
- Practiced clean code patterns and responsive UI with Bootstrap/Tailwind.

3) Freelance Front-End Developer

- Delivered +5 client-facing websites / dashboards with responsive design and clean UI implementation.
- Built reusable components and improved UX through better navigation and form validation.
- Communicated requirements with clients and delivered iterations based on feedback.

Education

- Ain Shams University – Cairo | 06/2023
- Bachelor's Degree in Law
- UI Design Course & Figma (Ehab Fayez)
- Pro Front-End Engineer ReactJS + TypeScript + Redux (Muhammad Naga (Codeawy))
- The Ultimate React Course React, Next.js, Redux (Jonas Schmedtmann)
- The Complete JavaScript Course (Jonas Schmedtmann)
- Front-End Development Course (Route Academy)

Languages

- Arabic – Native
- English – Advanced

Projects

Medicurb

- Medical transportation platform similar to Uber for healthcare services, connecting patients with hospitals for safe and timely transfers.

Highlights:

- Implemented authentication and secure data handling.
- **Implemented** Google Maps API to enable location-based servicesBuilt reusable components and handled complex forms and validations.

Technologies: React.js, React Router, Context API, Axios, Formik & Yup, JWT Decode, Google Maps API, Bootstrap

Ecommerce

- Full-featured e-commerce web application providing a seamless shopping experience for users and admins.

Highlights:

- Product listing, cart system, and order management.
- API integration with React Query for optimized data fetching.

Technologies: React.js, React Router, React Query, Context API, Axios, Formik & Yup, Bootstrap

Admin News

- Admin dashboard for managing news articles (create, edit, delete) with a streamlined content management workflow.
- **Technologies:** React.js, React Router DOM, Firebase, Bootstrap, HTML, CSS and Font Awesome.

Yummy

- A platform where users can explore various recipes, sort them by category, and access step-by-step cooking instructions with an accompanying video tutorial for each recipe.
- **Technologies:** HTML5, CSS3, JavaScript, Bootstrap and Font Awesome.

Weather

- Weather forecasting web app that shows current conditions and multi-day forecasts for a selected city, demonstrating API integration and a responsive UI.
- **Technologies:** HTML5, CSS3, JavaScript, Bootstrap and Font Awesome.
